In providing this information Prudential Retirement is not undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity. Prudential Retirement may benefit from advisory and other fees paid to it or its affiliates for managing, selling, or settling of the Prudential mutual funds and other investment products or securities offered by Prudential Retirement or its affiliates. Investment vehicles sponsored or managed by a Prudential Retirement affiliate generate more revenue for the Prudential enterprise than non-proprietary investment vehicles. Prudential Retirement’s sales personnel generally receive greater compensation on proprietary investment vehicles. Prudential Retirement may benefit directly from the differences between investment earnings of Prudential Retirement’s stable value funds and the amount credited to deposits in those funds. Prudential Retirement may also benefit from broker-dealer or other entities’ co-sponsorship of Prudential conferences.

This guide will help provide a glossary of terms and benchmark definitions commonly found on fund fact sheets.

Fund/Portfolio Category Morningstar, an investment research and investment management firm, assigns each mutual fund to a category, based on their actual investment style as measured by their underlying portfolio holdings over the past three years. Categories for Manager of Managers separate accounts are determined by Prudential.

Expense Ratio The net and gross expenses shown include the total operating expenses of the fund and the indirect expenses of the fund’s underlying portfolios. Your investment returns are reduced by various fees and expenses. For each plan investment option, the “Expense Ratio” presentation shows these charges as an annual percentage. Depending on the type of investment, these charges are paid to Prudential or to unaffiliated mutual fund complexes or bank collective trusts. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund’s monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.)

Morningstar Rating™ Portfolio’s overall rating. Morningstar Rating™ (Open End Mutual Funds, Closed End Funds, or Variable Annuity Underlying Funds) For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund’s monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. Morningstar compares each group variable annuity’s risk-adjusted return to the open-end mutual fund rating breakpoints for that category. The group variable annuity Morningstar Rating does not affect the retail mutual fund data published by Morningstar. Consistent with the open-end mutual fund ratings, the top 10% of group variable annuities in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results.

Morningstar Rating™ (Group Annuity-Variable Annuity Subaccounts) The Morningstar Rating™ is provided for those group variable annuities with at least a three-year history. Ratings are based on the group variable annuity’s Morningstar Risk-Adjusted Return measure which accounts for variation in monthly performance, placing more emphasis on downward variations and rewarding consistent performance. Morningstar compares each group variable annuity’s risk-adjusted return to the open-end mutual fund rating breakpoints for that category. The group variable annuity Morningstar Rating does not affect the retail mutual fund data published by Morningstar. Consistent with the open-end mutual fund ratings, the top 10% of group variable annuities in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for each group variable annuity is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results.

Morningstar Rating™ (Based on Extended Performance) Please note, some of the Morningstar proprietary calculations, including the Morningstar Rating™, are not customarily calculated based on adjusted historical returns. The calculation of this investment does not affect the retail mutual fund data published by Morningstar. For each retail mutual fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund’s monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. Morningstar compares each retail mutual fund’s risk-adjusted return to the open-end mutual fund rating breakpoints for that category. The Morningstar Rating does not affect the retail mutual fund data published by Morningstar. Consistent with the open-end mutual fund ratings, the top 10% of retail mutual funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a retail mutual fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. This investment’s independent Morningstar Rating metric is then compared against the retail mutual fund universe breakpoints to determine its hypothetical rating. Past performance is no guarantee of future results.

Portfolio Manager The name of the person(s) who determines which stocks, bonds and cash equivalents belong in the investment portfolio.

Morningstar Style Box/Investment Style Box While the category description tells you how the portfolio has been run in the past, the Style Box is a snapshot of what the portfolio currently owns. For equity separate accounts, Investment Style Box data is based on a quarter lag and assigned by Prudential.

Morningstar Style Box™ The Morningstar Style Box™ reveals a fund’s investment strategy. For equity funds the vertical axis shows the market capitalization of the long stocks owned and the horizontal axis shows investment style (value, blend, or growth).

For fixed-income funds, the vertical axis shows the credit quality of the long bonds and the horizontal axis shows interest rate sensitivity as measured by a bond’s effective duration.

Morningstar seeks credit rating information from fund companies on a periodic basis (e.g., quarterly). In category rating, the Morningstar Rating™ is determined on the basis of credit ratings reported by fund companies that have been issued by all Nationally Recognized Statistical Rating Organizations (NRSROs). For a list of all NRSROs, please visit http://www.sec.gov/divisions/marketreg/ratingagency.htm. Additionally, Morningstar accepts foreign credit ratings from widely recognized or registered rating agencies. If two rating organizations/agencies have rated a security, fund companies are to report the lower rating; if three or more organizations/agencies have rated a security, fund companies are to report the median rating, and in cases where there are more than two organization/agency ratings and a median rating does not exist, fund companies are to use the lower of the two middle ratings. PLEASE NOTE: Morningstar, Inc. is not itself an NRSRO nor does it issue a credit rating on the fund. An NRSRO or rating agency ratings can change from time-to-time.

For credit quality, Morningstar combines the credit rating information provided by the fund companies with an average default rate calculation to come up with a weighted-average credit quality. The weighted-average credit quality is currently a letter that roughly corresponds to the scale used by a leading NRSRO. Bond funds are assigned a style box placement of “low”, “medium”, or “high” based on their average credit quality. Funds with a low credit quality are those whose weighted-average credit quality is determined to be less than “BBB-”; medium are those less than “AA-”, but greater or equal to “BBB-”; and high are those with a weighted-average credit quality of “AA+” or higher. When classifying a bond portfolio, Morningstar first compares the fund’s weighted-average credit quality to the fund’s respective default rates (as determined by Morningstar’s analysis of actual historical default rates). Morningstar then averages these default rates to determine the average default rate for the entire bond fund. Finally, Morningstar maps this average default rate to its corresponding credit rating along a convex curve.

For interest-rate sensitivity, Morningstar obtains from fund companies the average effective duration of the fund’s bond portfolio. Morningstar determines the average effective duration of a fund by averaging the average effective durations of the fund’s holdings. Morningstar determines the average effective duration of a fund’s holdings by multiplying the effective duration of each holding by the dollar amount of the holding and dividing the result by the fund’s total dollar holdings. Morningstar then averages the results for the fund and its holding to arrive at the fund’s average effective duration. Morningstar then averages the average effective duration of the fund and its holdings to arrive at the fund’s average effective duration. Morningstar uses the fund’s average effective duration to classify the fund into one of three major interest-rate sensitivity categories: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: more than 3.5 years and less than 7 years; and (iii) Extensive: more than 7 years. In addition, for non-US taxable and non-US domiciled fixed income funds static duration breakpoints are used: (i) Limited: less than or equal to 3.5 years; (ii) Moderate: greater than 3.5 and less than equal to 6 years; (iii) Extensive: greater than 6 years.

Morningstar Volatility Rank is an investment’s 3-year standard deviation overall percentile rank within its US open-end, VAIL fund, or VAL subaccount universe. The investment with the lowest standard deviation receives a rank of 1. We then classify investment portfolios as having one of three volatility levels relative to all types of mutual funds: Low, Moderate, and High. Investments with wider ranges of returns (if applicable) Morningstar considers riskier than “low” volatility investments, which have had smaller ranges of returns.

The Fund Fact Sheet User’s Guide Page 1 0233352
In addition to registered mutual funds and bank collective trust funds, PRIAC makes available an array of insurance company separate accounts ("Separate Account") from which the retirement plan’s fiduciary can construct the investment lineup for your retirement plan. A PRIAC Separate Account is an insurance company separate account whose investors include only qualified retirement plans and certain governmental retirement plans. PRIAC makes most Separate Accounts available as commingled investment vehicles; however, in certain instances, PRIAC may make a Separate Account available only to a single retirement plan client.

PRIAC offers a variety of different types of Separate Accounts through a group annuity contract issued by PRIAC. Each retirement plan’s fiduciary is generally responsible for all investment decisions related to its plan and for selecting the underlying investment options. Selection or termination of the Fund on a retirement plan’s investment lineup is the sole responsibility of each retirement plan’s fiduciary. These Separate Accounts are not part of the Manager of Managers program.

A Custom Client Separate Account PRIAC provides investors with the information in the Fact Sheet to assist them in making investment decisions regarding the Fund. Investors must determine whether any other information is necessary in making those decisions. The investor is solely responsible for obtaining any other information required by the investor, which may not be available from PRIAC. To the extent PRIAC provides such information, PRIAC makes no warranty as to the accuracy of such information and makes no undertaking to continue to provide such information unless PRIAC agrees to continue to provide such information in writing. The investor is solely responsible for the decision to invest or continue to invest in the Fund. PRIAC assumes no responsibility for any investor’s decision to invest or continue to invest in the Fund. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary. These Separate Accounts are not part of the Manager of Manager’s program.

ISelect Platform: Limitation of PRIAC’s Responsibilities Institutional Select Separate Accounts PRIAC provides investors with the information in this Fact Sheet to assist them in making investment decisions regarding the Fund. Investors must determine whether any other information is necessary in making those decisions. The investor is solely responsible for obtaining any other information required by the investor, which may not be available from PRIAC. The investor is solely responsible for the decision to invest or continue to invest in the Fund. PRIAC assumes no responsibility for any investor’s decision to invest or continue to invest in the Fund. These Separate Accounts are not part of the Manager of Managers program and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the investment manager. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

PRIAC Manager-of-Managers Institutional Sub-Advised Separate Accounts With respect to separate accounts designated by Prudential as Institutional Sub-Advised Funds under the Manager of Managers Program, PRIAC acknowledges it is a fiduciary as defined by ERISA Section 3(38), as amended, for the selection, monitoring, and, if necessary, the replacement of the investment manager. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

PRIAC Manager-of-Managers Retail-Branded Sub-Advised Separate Accounts With respect to separate accounts designated by Prudential as Retail-Branded Sub-Advised Funds under the Manager of Managers Program, PRIAC acknowledges it is a fiduciary as defined by ERISA Section 3(38), as amended, for the selection, monitoring, and, if necessary, the replacement of the investment manager. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

Proprietary Separate Accounts Proprietary Funds are managed by an affiliate of PRIAC. Although PRIAC may provide periodic monitoring with respect to certain Proprietary Funds, Proprietary Funds are not part of PRIAC’s Manager-of-Managers Program, and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the investment manager. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

Custom Plan Investment Options (Recordkeeping Constructs) These investment options are designed and maintained by your plan sponsor and/or the plan’s investment adviser and are not investment options offered by PRIAC. PRIAC provides investors with the information in this Fact Sheet to assist them in making investment decisions regarding the investment option. Investors must determine whether any other information is necessary in making those decisions. The investor is solely responsible for obtaining any other information required by the investor, which may not be available from PRIAC. The investor is solely responsible for the decision to invest or continue to invest in the investment option. PRIAC assumes no responsibility for any investor’s decision to invest or continue to invest in the investment option. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.
3-Year Constant Maturity Treasury (CMT) Index: Treasury Yield Curve Rates, commonly referred to as "Constant Maturity Treasury" rates, or CMTs, are interpolated by the U.S. Treasury from the daily yield curve. This curve, which relates the yield on a security to its time to maturi-
ty is based on monthly closing market yields on actively traded Treasury securities in the over-the-counter market. These market yields are calculated from compositions of quotations obtained by the Federal Reserve Bank of New York. The yields are read from the yield curve at a fixed maturity of 3 years.

5-Year Treasury Average Yield: The average daily treasury yield for U.S. Treasury Notes with a maturity of three years (negotiable debt obligations of the U.S. Government, considered intermediate in maturity).

60% Russell 1000 Growth Index/40% Bloomberg Barclays U.S. Aggregate Bond Index: An unmanaged, weighted-average composite consisting of the Russell 1000<sup>®</sup> Growth Index (60%) and the Bloomberg Barclays Aggregate Bond Index (40%).

60% Bloomberg Barclays U.S. Intermediate Government/ Credit Index: An unman-
aged, weighted-average composite con-
sisting of the Russell 1000 Growth Index (60%) and the Bloomberg Barclays Intermediate U.S. Government/ Credit Index (40%).

60% Russell 1000 Value Index/40% Bloomberg Barclays U.S. Aggregate Bond Index: An unmanaged, weighted-average composite consisting of the Russell 1000 Value Index (60%) and the Bloomberg Barclays Aggregate Bond Index (40%).

60% Russell 1000 Value Index/40% Bloomberg Barclays U.S. Intermediate Government/ Credit Index: An unman-
aged, weighted-average composite con-
sisting of the Russell 1000 Value Index (60%) and the Bloomberg Barclays Intermediate U.S. Government/ Credit Index (40%).

60% S&P 500 Index/40% Bloomberg Barclays U.S. Aggregate Bond Index: An unmanaged, weighted-average composite Index that consists of the S&P 500 Index (60%) and the Bloomberg Barclays U.S. Aggregate Bond Index (40%).

Bloomberg Barclays Global Aggregate Bond Index Ex-US (USD Hedged): Measures the performance of global invest-
ment grade fixed-rate debt markets that excludes USD-dominated securities.

Bloomberg Barclays Municipal 10 Yr 8-12 Index: Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 10 years(8-12), including state and local general obliga-
tion bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays Municipal 20 Yr 17-22 Index: Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 20 years(17-
22), including state and local general obliga-
tion bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays Municipal 3 Yr 2-4 Index: Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 3 years(2-4), including state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays U.S. Aggregate Bond Index: Measures the performance of investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corpo-
rate securities, MBS (agency fixed-rate and hybrid ARM pass-through’s), ABS, and CMBS. It rolls up into other Bloomberg Barclays flagship indices, such as the multi-
currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt.

Bloomberg Barclays Municipal California Exempt TR: Measures the per-
formance of USD-denominated long-term tax exempt bond market, including California bonds only.

Bloomberg Barclays Municipal New York Exempt TR: Measures the perform-
ance of USD-denominated long-term tax exempt bond market, including New York bonds only.

Bloomberg Barclays U.S. Corporate High-Yield Bond Index: Measures the perform-
ance of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds, including corporate bonds, fixed-rate bullet, putable, and callable bonds, SEC Rule 144A securities, Original issue zeros, Pay-in-kind (PIK) bonds, Fixed-rate and fixed-to-floating capital securities.

Bloomberg Barclays U.S. High Yield Bond Index, 2% Issuer Capped: Measures the performance of USD-denomini-
tated, non-investment grade, fixed-rate, tax-
able corporate bonds. It follows the same rules as the uncapped index but limits the exposure of each issuer to 2% of the total market value and redistributes any excess market value index-wide on a pro-rata basis.

Bloomberg Barclays U.S. Intermediate Government/ Credit Index: Measures the performance of the U.S. investment grade bond market, with index composi-
tions for Agencies, Financial Institutions, Industrial, Treasuries and Utility, with remaining time to maturity of 1-10 years. It’s a custom index.

Bloomberg Barclays U.S. Credit Index: Measures the performance of the US Corporate and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities. It is a subset of the US Government/Credit Index and the US Aggregate Index.

Bloomberg Barclays Govt/Corp 1 Yr Duration Index: Measures the performance of USD-denominated long-term tax exempt bond market, with maturities of 1 year, including Treasuries, government-related and corporate bonds, and prerefunded bonds, excluding US D-dominated, non-investm ent grade, taxable corporate bonds. It follow s the sam e

Bloomberg Barclays U.S. Government/Credit Index: Measures the performance of the U.S. Aggregate Index including Treasuries, government-related issues and
corporates. It is a subset of the U.S. Aggregate Index.

Bloomberg Barclays U.S. Credit Index: Measures the performance of the US Corporate and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities. It is a subset of the US Aggregate Index.

Bloomberg Barclays U.S. Mortgate Backed Securities Index: Measures the performance of the agency mortgage-backed pass-through securities (both fixed-rate and hybrid ARM) issued by Fannie Mae (GNMA), Freddie Mac (FHLMC), and Freddie Mac (FHLMC).

Bloomberg Barclays U.S. Municipal Index: Measures the performance of USD-denominated long-term tax exempt bond market, including state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays U.S. Universal Index: Measures the performance of USD-denominated, taxable bonds that are rated either investment grade or high-yield. It represents the union of the U.S. Aggregate Index, U.S. Corporate High Yield Index, Investment Grade 144A Index, Eurobollar Index, U.S. Emerging Markets Index, and

**Source:** Bloomberg Barclays Indices, POINT ©2017 Bloomberg Barclays Inc. “Bloomberg Barclays and POINT are registered trademarks of Bloomberg Barclays Inc. or its affiliates”
excludes USD-dominated securities.

Bloomberg Barclays Municipal 10 Yr-12 Index: Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 10 years (8-12), including state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays Municipal 20 Yr 17-22 Index: Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 20 years (17-22), including state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays Municipal 3 Yr 2-4 Index: Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 3 years (2-4), including state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays U.S. Aggregate Bond Index: Measures the performance of investment grade, U.S. dollar-denominated, fixed-rate corporate bonds, government-related and corporate securities, Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-through’s), ABS, and CMBS. It rolls up into other Bloomberg Barclays flagship indices, such as the multi-currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt.

Bloomberg Barclays U.S. Aggregate Government California Exempt TR: Measures the performance of USD-denominated long-term tax exempt bond market, including California bonds only.

Bloomberg Barclays U.S. Corporate High-Yield Index: Measures the performance of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds, including corporate bonds, fixed-rate bullet, putable, and callable bonds, SEC Rule 144A securities, Original issue zeroes, Pay-in-kind (PIK) bonds, fixed-rate and fixed-to-floating capital securities.

Bloomberg Barclays U.S. High Yield Bond Index, 2% Issuer Capped: Measures the performance of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds. It follows the same rules as the uncapped index but limits the exposure of each issuer to 2% of the total market value and redistributes any excess market value index-wide on a pro-rata basis.

Bloomberg Barclays U.S. Intermediate Government/Credit Index: Measures the performance of the U.S. investment grade fixed rate bond market, with index components for Agencies, Financial Institutions, Industrial, Treasuries and Utility, with remaining time to maturity of 1-10 years. It’s a custom index.

Bloomberg Barclays U.S. Credit Index: Measures the performance of the U.S. Corporate and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities. It is a subset of the US Government/Credit Index and the US Aggregate Index.

Bloomberg Barclays Govt/Corp 1 Yr Duration Index: Measures the performance of investment grade, U.S. denominated, fixed-rate securities excluding STRIPS, TIPS and floaters. Its minimum index rating is A3 and the max maturity is 5 years.

Bloomberg Barclays U.S. Government 1-5 Year Index: Measures the performance of US Treasuries and US Agency bonds with maturities of 1 (inclusive) to 5 (exclusive) years.

Bloomberg Barclays U.S. Government/Credit 1-5 Year Index: Measures the performance of the non-secured component of the U.S. Aggregate Index including treasuries, government-related issued funds and corporates. It is a subset of the U.S. Aggregate Index.

Bloomberg Barclays U.S. Government/Credit 5-10 Year Index: Measures the performance of the Corporate and a non-corporate component with maturities of 5-10 year that includes foreign agencies, sovereigns, supranationals and local authorities. It is a subset of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Bloomberg Barclays U.S. Government/Credit 10+ Year Index: Measures the performance of the U.S. Aggregate Index including Treasuries, government-related issues and corporates. It is a subset of the U.S. Aggregate Index.

Bloomberg Barclays U.S. Long Term Government/Credit Index: Measures the performance of the non-secured component of the U.S. Aggregate Index with maturities of 10 years and greater, including Treasuries, government-related issues and corporates. It is a subset of the U.S. Aggregate Index.

Bloomberg Barclays U.S. Long Term Credit Index: Measures the performance of the US Corporate and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities with maturities of 10 years and greater. It is a subset of the US Government/Credit Index and the US Aggregate Index.

Bloomberg Barclays U.S. Mortgage Backed Securities Index: Measures the performance of the agency mortgage-backed pass-through securities (both fixed-rate and hybrid ARM) issued by Ginnie Mae (GNMA), Fannie Mae (FMRA), and Freddie Mac (FHLMC).

Bloomberg Barclays U.S. Municipal Bond Index: Measures the performance of USD-denominated long-term tax exempt bond market with maturities of 20 years, including state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds.

Bloomberg Barclays U.S. Universal Income Index: Measures the performance of U.S. domiciled convertibles that are sold in U.S. domestic market. It follows the same rules as the uncapped index but limits the exposure of each issuer to 2% of the total market value and redistributes any excess market value index-wide on a pro-rata basis.

Bloomberg Barclays U.S. Mortgage Backed Securities Index: Measures the performance of the agency mortgage-backed pass-through securities (both fixed-rate and hybrid ARM) issued by Ginnie Mae (GNMA), Fannie Mae (FMRA), and Freddie Mac (FHLMC).

BofAML 100 Technology Index: Measures the performance of a cross-section of large, actively traded technology stocks and ADRs. It was developed with a base value of 200.00 as of January 30, 1998. The index is rebalanced annually based on closing prices on the third Friday in December. It is equal-dollar weighted.

BofAML 3-Month U.S. Treasury Bill Index: Measures the performance of a single issue of outstanding treasury bill which matures closest to, but not beyond, three months from the rebalancing date. The issue is purchased at the beginning of the month and held for a full month; at the end of the month that issue is sold and rolled into a newly issued selected index.

BofAML All Convertibles/All Qualities Index: Measures the performance of USD-denominated convertibles that are sold in the US market and publicly traded in the US including coupon bonds, OID, and zeros. Qualifying securities must have at least $50m in market value. Qualifying companies must have a significant revenue footprint in the US. It is capitalization-weighted.

BofAML Preferred Stock Fixed Rate Index: Measures the performance of fixed-rate US dollar denominated preferred securities issued in the US domestic market. Qualifying securities must have an investment grade rating and must have an investment grade rated country of risk.

BofAML High Yield Master II Index: Measures the performance of short-term US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of $100 million. It is capitalization-weighted.

BofAML USD LIBOR 3 Mon CM Index: Measures the performance of a synthetic asset paying Libor to a stated maturity. It is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that days fixing rate. That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument.

CBOE S&P 500 BuyWrite BXM: designed to show the hypothetical performance of a portfolio that engages in a buy-write strategy using S&P 500 index call options.

Citigroup 3 Month T-Bill Index: Measures the performance of the last three three-month Treasury bill month-end rates.

Citigroup ESBI-Capped Brady Index: Measures the performance of US Dollar emerging market/Credit/Debt index that has been restructured under the Brady Plan.

Citigroup Dollar World Non-U.S. Government Bond Index: Measures the performance of fixed-rate, local currency, investment-grade sovereign bonds of all WGBI countries except the United States and is stated in US dollar terms. It is a subset of Citigroup World Government Bond Index (WGBI).

Custom (Conservative, Moderate, Aggressive) Portfolios Benchmarks: These are composite benchmarks that reflect the weighted average of the benchmarks of the underlying funds in which each specific Custom Portfolio invests.

Dow Jones Relative Risk Indices: Are total-portfolio indices that allow investors to evaluate the returns on their portfolios considering the amount of risk they have taken.

The family includes global and U.S. indices for five risk profiles—aggressive, moderately aggressive, moderate, moderately conservative and conservative. These profiles are defined based on incremental levels of potential risk relative to the risk of an all-stock index.

Dow Jones Target Indices: Measures the performance of total portfolios of stocks, bonds and cash that automatically adjust over time to reduce potential risk as an investor’s target may change.

Dow Jones U.S. Financials Sector Index: Measures the performance of all U.S. stocks in the Dow Jones US Index classified into financial sector. The sector classifications is defined by the proprietary classification system which used by S&P Dow Jones. It is a free-float weighted index.

Dow Jones U.S. Healthcare Sector Index: Measures the performance of all U.S. stocks in the Dow Jones US Index classified into health care sector. The sector classifications is defined by the proprietary classification system which used by S&P Dow Jones. It is a free-float weighted index.

Dow Jones U.S. Select Real Estate Investment Trust (REIT) Index: Measures the performance of publicly traded real
estate investment trusts (REITs) and REIT-like securities. The index is a subset of the Dow Jones U.S. Select Real Estate Securities Index (RESI). The index is designed to serve as proxy for direct real estate investment, in part by excluding companies whose performance may be driven by factors other than the value of real estate.

**Dow Jones U.S. Select Real Estate Securities Index (RESI):** Measures the performance of publicly traded real estate securities. Represents equity real estate investment trusts (REITs) and real estate operating companies (REOCs) traded in the U.S.

**Dow Jones U.S. Telecommunications Sector Index:** Measures the performance of US stocks in the Dow Jones U.S Index that are classified into telecommunications sector. The sector classifications is defined by the proprietary classification system which used by S&P Dow Jones. It is a free-floating weighted index.

**Dow Jones Wilshire 5000 Total Market Index:** Measures the performance of all US equity securities with readily available price data. Over 96% of total market capitalization and float-adjusted security returns are used to adjust the index. It is weighted by both full market capitalization and float-adjusted market capitalization.

**Dow Jones Wilshire REIT Index:** Measures the performance of U.S. publicly-traded Real Estate Investment Trusts. It’s a subset of the Wilshire Real Estate Securities Index. The purpose is to create indexes of publicly-traded real estate equity securities without the limitations of other appraisal-based indexes. These indexes serve as proxies for direct real estate investing by excluding securities whose value is always tied to the value of the underlying real estate (mortgage REITs, net-lease REITs, real estate finance companies, mortgage brokers and bankers, commercial and residential real estate brokers, home builders, large landlords and sub-dividers of unimproved land, hybrid REITs and timber REITs).

**FTSE NAREIT U.S. Real Estate Index:** Measures the performance of REIT-based capitalization-weighted indexes that span the commercial real estate spectrum. The US component of the index contains all Equity REITs not designated as Timber REITs or Infrastructure REITs. The index is market-capitalization weighted.

**IA SBJI US 30 Day TBill Index:** Measures the performance of a single issue of outstanding Treasury Bill which matures closest to, but not beyond, one month from the rebalancing date. The index is rebalanced on the third Sunday of each month. The index is calculated by Morningstar and the raw data is from WSJ.

**iMoneyNet Taxable Money Funds Index:** Measures the equal weighted returns of over 1,600 of the largest taxable money market funds.

**JPM EMBI Global Index:** Measures the performance of fix-rate for foreign-currency denominated debt instruments including brady bonds, loans, Eurobonds in emerging markets. Countries covered are Argentina, Brazil, Bulgaria, Mexico, Morocco, Nigeria, the Philippines, Poland, Russia, and South Africa. It covers more of the eligible instruments than the EMBI+ by relaxing somewhat the strict EMBIs limits on secondary market trading liquidity.

**JP Morgan GBI Global ex-US Index (US Dollar Hedged):** Is an unmanaged index market representative of the total return performance in U.S. dollars on an unhedged basis of major non-U.S. bond markets.

**JPM GBI Global Ex US TR Hdg USD:** The J.P. Morgan GBI series provides a comprehensive measure of local currency denominated fixed rate government debt issued in developed markets. The series consists of five core index products covering developed markets. The broadest series tracks 27 countries.

**Lifetime Funds Custom Benchmarks:** These indices are composite benchmarks that reflect the weighted average of the benchmarks for the underlying funds in which each specific Lifetime Fund invests.

**Lipper Balanced Funds Index:** Represents the average of the 30 largest qualifying mutual funds (based on year-end total net assets) for the investment objective to conserve principal (by maintaining a balanced portfolio of stocks and bonds). Typically, the stock/bond ratioces around 60%/40%.

**Lipper Emerging Markets Funds Index:** Is an equal dollar weighted index of the 30 largest qualifying mutual funds in the Lipper Emerging Markets universe (based on year-end total net assets).

**Lipper Flexible Portfolio Funds Index:** Represents the average of the 30 largest qualifying mutual funds in the Lipper Flexible Portfolio investment objective category (based on year-end total net assets). The mutual funds that comprise the Index allocate their investments across various asset classes, including domestic common stocks, bonds and money market instruments, with a focus on total return.

**Lipper Global Funds Index:** The average of the 30 largest qualifying mutual funds (based on year-end total net assets) for the investment objective to invest at least 25% of its portfolio in securities traded outside of the United States. These funds may own U.S. securities as well.

**Lipper High Yield Bond Funds Index:** Is a widely recognized index of the 30 largest mutual funds that invest primarily in high yield bonds.

**Lipper International Funds Index:** Measures the performance of the 30 largest mutual funds in the international core fund objective, as determined by Lipper, Inc.

**Lipper Intermediate Investment Grade Index:** Represents the average of the 30 largest qualifying mutual funds (based on year-end total net assets) for the investment objective. Funds that invest primarily in investment-grade debt issues (rated in the top four grades) with dollar-weighted average maturities of five to ten years.

**Lipper Large-Cap Core Funds Index:** Represents the average of the 30 largest qualifying mutual funds (based on year-end total net assets) in the Lipper Large-Cap Core category. These funds, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) greater than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P Supercomposite 1500 Index. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index.

**Lipper Large-Cap Growth Funds Index:** Is an unmanaged, equally weighted performance index of the 30 largest qualifying mutual funds (based on net assets) in the Lipper Large-Cap classification.

**Lipper Large-Cap Value Funds Index:** Measures the performance of the 30 largest qualifying mutual funds that invest in the large-cap growth value range, as determined by Lipper, Inc. Lipper categorizes Value Funds as those that seek long-term growth of capital by investing in companies that are considered to be undervalued relative to a major unmanaged stock index based on a price-to-earnings, price-to-book value, asset value or other factors.

**Lipper Mid Cap Funds Index:** Is an unmanaged, equally weighted performance index of the 30 largest qualifying mutual funds (based on net assets) in the Lipper Micro Cap classification.

**Lipper Mid-Cap Core Funds Index:** Represents the average of the 30 largest qualifying mutual funds (based on year-end total net assets) in the Lipper Mid-Cap Universe. These funds, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. These funds typically have an above average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P Midcap 400 Index.

**Lipper Mid-Cap Growth Funds Index:** Represents the average of the 30 largest qualifying mutual funds (based on year-end total net assets) in the Lipper Mid-Cap Universe. These funds, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 300% of the dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. These funds typically have a below average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P Midcap 400 Index.

**Lipper Real Estate Funds Index:** An equally weighted index of the 30 largest qualifying mutual funds (based on year-end total net assets) in the Lipper Real Estate universe. These funds invest at least 85% of their portfolios in equity securities of domestic and foreign companies engaged in the real estate industry.

**Lipper Science and Technology Funds Index:** Represents the average of the 30 largest qualifying mutual funds in the Lipper Science and Technology universe (based on year-end total net assets). These funds, by portfolio practice, invest at least 65% of their equity assets in science and technology stocks.

**Lipper Small-Cap Core Funds Index:** Measures the performance of the 30 largest qualifying mutual funds in the small-capitalization range, as determined by Lipper, Inc.

**Lipper Small-Cap Growth Funds Index:** Is an unmanaged, equally weighted performance index of the 30 largest qualifying mutual funds (based on net assets) in the Lipper Small-Cap classification.

**Lipper Small-Cap Value Funds Index:** Represents the average of the 30 largest qualifying mutual funds (based on year-end total net assets) in the Lipper Small-Cap Universe. These funds, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) less than 250% of the dollar-weighted median of the smallest 500 of the middle 1,000 securities of the S&P SuperComposite 1500 Index. These funds typically have below average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P SmallCap 600 Index.

**Morningstar Long-Only Commodity Index:** Measures the performance of future contracts on eligible long commodities. Eligibility is defined as a commodity that has future contracts traded on one of the US exchanges and rank in the top 95% by the 12-month average of total dollar value of open interest. The index is reconstituted annually, on the third Friday of December each year. It is a fully collateralized commodity futures index.

**Morningstar Lifetime Moderate Indices:** Measures the performance of a portfolio of global equities, bonds and traditional inflation hedges such as commodities and TIPS. This portfolio is held in proportions appropriate for an investor who is recently retired. The Moderate risk profile is for investors who are comfortable with average exposure to equity market volatility.

**Morningstar Target Risk Index:** The Morningstar Target Risk Index family is designed to meet the needs of investors who would like to maintain a target level of equity exposure through a portfolio diversification across a range of inflation-hedged instruments. The Morningstar Moderate Target Risk Index seeks approximately 80% exposure to global equity markets.
Morningstar Moderate Target Risk Index: The Morningstar Target Risk Index family is designed to meet the needs of investors who plan to maintain a target level of equity exposure through a portfolio diversified across equities, bonds and inflation-hedged instruments. The Morningstar Moderate Target Risk Index seeks approximately 60% exposure to global equity markets.

Morningstar Technology Sector Index: Measures the performance of companies engaged in the design, development, and support of computer operating systems and applications. This sector also includes companies that provide computer technology consulting services. Also includes companies engaged in the manufacturing of computer equipment, data storage products, networking products, semiconductors, and components.

MSCI ACWI Investable Market Index (IMI): captures large, mid and small cap representation across 23 Developed Markets (DM) and 23 Emerging Markets (EM) countries. With 8,594 constituents, the index is comprehensive, covering approximately 99% of the global equity investment opportunity set.

MSCI All Country Far East Ex. Japan Index: Measures the performance of the large and mid cap segments of the particular regions, excluding Japan equity securities, including developed and emerging market. It is free float-adjusted market-capitalization weighted.

MSCI All Country World Ex. U.S. Index: Measures the performance of the large and mid cap segments of the particular regions, excluding USA equity securities, including developed and emerging market. It is free float-adjusted market-capitalization weighted.

MSCI EAFE Growth Index (net): Measures the performance of the growth large and mid cap segments of the particular regions, excluding USA equity securities, including developed and emerging market. It is free float-adjusted market-capitalization weighted.

MSCI EAFE Index (net): Measures the performance of the large and mid cap segments of developed markets, excluding the US & Canada equity securities. It is free float-adjusted market-capitalization weighted.

MSCI EAFE Value Index (net): Measures the performance of the value large and mid cap segments of developed markets, excluding the US & Canada equity securities. It is free float-adjusted market-capitalization weighted.

MSCI EMF Index (net): Measures the performance of the large and mid cap segments of emerging market equity securities. It is free float-adjusted market-capitalization weighted.

MSCI EM (Emerging Markets) Latin America Index: Measures the performance of the large and mid cap segments of emerging Latin America equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Emerging Markets Net Dividend Index: Measures the performance of the large and mid cap segments of emerging market equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Europe Index: Measures the performance of the large and mid cap segments of developed Europe equity securities. It is free float-adjusted market-capitalization weighted.

MSCI India Index: Measures the performance of the large and mid cap segments of India equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Japan Index: Measures the performance of the large and mid cap segments of Japan equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Pacific Index: Measures the performance of the large and mid cap segments of the developed Pacific region equity securities. It is free float-adjusted market-capitalization weighted.

MSCI Pacific Free Index: Same constituents as MSCI Pacific Index, the “free” index captures the history of certain of those constituents that were not deemed “developed” in previous years.

MSCI US REIT Index: Measures the performance of the large, mid and small cap segments of the US equity securities. It is comprised of Equity REITs securities and based on the MSCI USA Investable Market Index, with the exception of Mortgage REIT and selected Specialized REITs. The index represents approximately most of the US REIT universe and securities are classified in the REIT sector according to the Global Industry Classification Standard. It is a free float market capitalization weighted index.

MSCI World Ex USA SMID Index: Measures the performance of small and mid cap segments of World excluding USA equity securities. It captures mid and small representation across 22 of 23 developed market countries and 21 emerging markets countries and it covers approximately 28% of the free float-adjusted market capitalization in each country. The index is free float-adjusted market-capitalization weighted.

MSCI World Growth Index (net): Measures the performance of the growth large and mid cap segments of world equity securities. It is free float-adjusted market-capitalization weighted.

MSCI World Index: Measures the performance of the large and mid cap segments of world equity securities. It is free float-adjusted market-capitalization weighted.

MSCI World Managed Market Cap Index: Represents the performance of the world large and mid cap segments of 25 developed markets, excluding the US & Europe, and is free float-adjusted market-capitalization weighted.

MSCI World Stand. Index: Represents the performance of the world large and mid cap segments of 25 developed markets, excluding the US & Europe, and is free float-adjusted market-capitalization weighted.

MSCI World Value Index (net): Measures the performance of the value large and mid cap segments of world equity securities.

National Association of Real Estate Investment Fiduciaries (NCREIF) Open-End Diversified Core Equity Fund Index (NFI-ODEC): Is a quarterly time series composite total rate of return measure of investment performance of a very large pool of diversified core real estate properties acquired in the private market for investment purposes only. All properties in the NPI have been acquired, at least in part, on behalf of tax-exempt institutional investors - the great majority being pension funds. As such, all index returns are held in a fiduciary environment.

NYSE Arca Tech Index: The NYSE Arca Tech 100 is comprised of 100 listed and over-the-counter stocks from 14 different sub-sectors including computer hardware, software, semiconductors, telecommunications, data storage and processing, electronics and biotechnology. Arcalex®, "ARCAX™", "ARCA®", "NYSE ArcaTechSM" and "NYSE Arca Tech 100SM" are trademarks of the NYSE Group, Inc. and Arcalex Holdings, Inc. This Fund is not sponsored, endorsed, sold or promoted by Arcalex Holdings, Inc. ("ARCA"). ARCA makes no representation or warranty regarding the ability of the Russell 100 Index to track general stock market performance.

NYSE Arca Tech Index: The NYSE Arca Tech 100 is comprised of 100 listed and over-the-counter stocks from 14 different sub-sectors including computer hardware, software, semiconductors, telecommunications, data storage and processing, electronics and biotechnology. ARCA makes no representation or warranty regarding the ability of the Russell 100 Index to track general stock market performance.

PRR® Composite Index: The Separate Account’s aggregate benchmark return, which is comprised of (a) the NCREIF Open-End Diversified Core Equity Fund Index ("NFI-ODEC"), S&P Developed Property Index and the Citigroup U.S. Domestic 3 Month 1-

Russell 2500® Growth Index: Measures the performance of the small to mid-cap growth segment of the US equity universe. It includes Russell 2500 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Russell 2500® Index: Measures the performance of the small to mid-cap segment of the US equity universe. It is a subset of the Russell 3000 index which includes approximately 2500 of the smallest securities based on the combination of their market cap and current index membership.

Russell 3000 Growth Index: Measures the performance of the broad growth segment of the US equity universe. It includes Russell 3000 index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Russell 3000® Index: Measures the performance of the largest 3000 US companies representing approximately 98% of the investable US equity market. It is market-capitalization weighted.

Russell Midcap® Growth Index: Measures the performance of the mid-cap growth segment of the US equity universe. It includes Russell midcap index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group.

Russell Midcap® Index: Measures the performance of the mid-cap segment of the US equity universe. It is a subset of Russell 1000 index and includes approximately 600 of the smallest securities based on a combination of their market cap and current index membership. The index represents approximately 31% of the total market capitalization of the Russell 1000 companies.

Russell Midcap® Value Index: Measures the performance of the mid-cap value segment of the US equity universe. It includes Russell midcap index companies with lower price-to-book ratios and lower forecasted growth values. It is market-capitalization weighted.

Russell Top 200 Index: Measures the performance of the largest cap segment of the US equity universe. It is a subset of the Russell 3000 index and includes approximately 200 of the largest securities based on a combination of their market cap and current index membership. The index represent approximately 68% of the US market.

SDFCP Retirement Simple Benchmark: Is a composite of other indexes. These subindexes represent two major asset classes-equity and fixed income. The asset classes are weighted within each Target Date Index to reflect a targeted level of risk. Over time, the weights are adjusted based on predetermined formulas to reduce the level of potential risk as the index’s maturity date approaches.

S&P 500 Index (50%), the Russell 2000 Index (5%), the MSCI EAFE Index (5%), and Bloomberg Barclays U.S. Aggregate Bond Index (40%). An unmanaged, weighted-average composite index.

S&P 1500 Consumer Discretionary Index: Measures the performance of consumer discretionary(sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Consumer Discretionary (sector).

S&P 1500 Cons Staples TR: Measures the performance of consumer staples (sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Consumer Staples (sector).

S&P 1500 Energy Index: Measures the performance of energy(sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Energy (sector).

S&P 1500 Financials TR: Measures the performance of Financials(sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Financials (sector).

S&P 1500 Health Care TR: Measures the performance of health care(sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Health Care (sector).

S&P 1500 Industrials Index: Measures the performance of industrials(sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Industrials (sector).

S&P 1500 Telecom Services TR: Measures the performance of Telecom Services(sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Telecom Services (sector).

S&P 1500 Utilities TR: Measures the performance of Utilities(sector) segment of US equity securities. It comprises those companies included in the S&P Composite 1500 that are classified as members of the Global Industry Classification Standard (GICS) Utilities (sector).

S&P 500® Index: Measures the performance of 500 widely held stocks in US equity market. Standard and Poor’s chooses member companies for the index based on market size, liquidity and industry group representation. Included are the stocks of industrial, financial, utility, and transportation companies. Since mid 1989, this composition has been more flexible and the number of issues in each sector has varied. It is market capitalization-weighted.

S&P 500 Technology Index: Measures the performance of all those companies held in the S&P 500 index that are classified as a technology information(sector) company using the Global Industry Classification Standard (GICS) system.

S&P 500 Value Index: Measures the performance of value stocks drawn from the S&P 500 index. The complete market capitalization of S&P 500 index is divided into growth and value segments by using three factors: sales growth, the ratio of earnings change to price, and momentum.

S&P Global REIT: Measures the performance of publicly traded equity REITs listed in both developed and emerging markets. It is a member of the S&P Global Property Index Series.

S&P Completion Index: Measures the performance of all members of the S&P TMI index except for the current constituents of the S&P 500. It covers approximately 3000 companies that are offering investors broad exposure to mid, small, and micro cap companies. The index is market-capitalization weighted.

S&P Composite 1500® Index: Measures the performance of widely available, liquid stocks in US equity market. It combines three leading indices - S&P 500, S&P MidCap 400, and S&P SmallCap 600, to cover approximately 90% of the US market capitalization.

S&P Developed Property Index: This index defines and measures the investable universe of publicly traded property companies domiciled in developed markets. The company in the index are engaged in real estate related activities, such as property ownership, management, development, rental and investment.

S&P MidCap 400 Index: Measures the performance of mid-sized US companies, reflecting the distinctive risk and return characteristics of this market segment. It comprises stocks in the middle capitalization range, covering approximately 7% of the US equity market.

S&P North American Natural Resources Sector Index: Measures the performance of US traded securities that are classified under the Global Industry Classification Standard (GICS) energy and materials (sector) excluding the chemicals (industry) and steel (sub-industry).

S&P/LSTA Leveraged Loan TR: Measures the performance of 100 loan facilities drawn from the S&P/LSTA (Loan Syndications and Trading Association) Leveraged Loan Index (LLI). Standard & Poor’s chooses these based on market weightings, spreads, and interest payments of the largest facilities in the leveraged loan market.

S&P Total Market Index: Measures the performance of all large, mid, small micro cap companies and other common equities listed on NYSE (including NYSE Arca), the NYSE Alternext, the NASDAQ Global Select Market, the NASDAQ Global Market and the NASDAQ Capital Market. It is market-capitalization weighted.

U.S. Treasury 6 Month Certificate of Deposit (CD) Index: The average of the secondary market interest rates for nationally traded 6 month certificates of deposit.

U.S. Treasury T-Bill Auction Average 3-Month Index: Measures the performance of average interest rate of US T-Bills securities with the maturity of 3 months.

Vanguard Balanced Composite Index: Made up of two unmanaged benchmarks, weighted 66% Dow Jones Wilshire 5000 Index and 40% Bloomberg Barclays U.S. Aggregate Bond Index through May 31, 2005; 60% MSCI U.S. Broad Market Index and 40% Bloomberg Barclays U.S. Aggregate Bond Index thereafter.

Wellington Composite Index: is a combination of unmanaged industry benchmarks: 65% S&P 500 Index and 35% Bloomberg Barclays Credit A or Better Index. Prior to March 1, 2000, weighted 65% S&P 500 Index and 35% Bloomberg Barclays Long Credit AA or Better Index.
DESCRIPTION/OBJECTIVE

The Prudential Day One® Income Fund (the "Fund") is a member of the Prudential Day One Funds (the "Funds"), a suite of multi-asset class funds (the "Funds"). They include Funds managed to specific target dates offered in five-year intervals through the year 2030, as well as a Day One Income Fund. The Day One Income Fund is designed for retirees or individuals who seek current income. The target date Funds are designed for participants planning to retire in or near the target year. In addition to anticipated retirement date, however, relevant factors for target date Fund selection may include age, risk tolerance, other investments owned, and planned withdrawal needs. The Funds are available for investment by certain retirement, pension and profit-sharing plans and other eligible investors.

The Funds are designed to provide a mix of traditional and non-traditional asset classes. Each Fund is a "fund of funds" that will invest in other pooled investment vehicles, including insurance company separate accounts, collective investment funds and/or mutual funds (the "Underlying Funds"). The asset allocation strategy and Glidepath of each target date Fund are intended to maximize the potential that the participant’s account balance will provide a source of retirement income. The Day One Income Fund’s asset allocation, with its goal of providing current income, does not progress along a Glidepath. The investment objective of each Fund is to perform consistently with its custom blended benchmark over a full market cycle. There is no guarantee, however, that any Fund will meet its investment objective or provide a source of retirement income.

Quantitative Management Associates LLC ("QMA"), an SEC-registered investment adviser and a Prudential Financial, Inc. company, has engaged by PRIAC to provide certain asset allocation and other investment advice relating to the operation of the Funds. QMA’s asset allocation outlook will be incorporated into the Funds’ Glidepath and Underlying Fund allocations, subject to the constraints mentioned below.

The Prudential Day One® Income Fund:

- Invests in multiple Underlying Funds, with the bond/stock & non-traditional weightings determined by the Glidepath (For introductory periods, the rebalancing and distribution of the mix by Fund, refer to the “Asset Classes Mix” chart.)
- Is rebalanced daily to maintain the predetermined asset allocation mix dictated by the Glidepath among the Underlying Funds. While the Fund is invested in a number of Underlying Funds, the component results are aggregated to produce one all-inclusive return. The performance benchmarks are a pro rata combination of the benchmarks for each Fund’s underlying assets classes, based on the asset allocation for that Fund.
- In accordance with the Funds’ pre-determined Glidepath, the Fund maintains an asset allocation of approximately 35% of the Fund allocated to equity and non-traditional investments, and approximately 65% allocated to fixed-income investments.
- Is reviewed periodically by PRIAC and QMA to determine whether the Glidepath and the Underlying Funds of the target-date and income Funds remain suitable to meet the Fund’s investment objectives. As a result of this review, PRIAC may modify the Glidepath, asset allocations and/or Underlying Funds. Management fees will not increase as a result of changes to the Glidepath, allocations, changes to the underlying Funds.

See Additional Description Continued on page 2.

There is no assurance the objectives will be met.

Fees in Performance. Prudential Day One® Income Fund expenses include 0.72% management expense. Other expenses for the Fund for the prior calendar year were 0.02%. Fees and expenses may vary, and they may also be higher or lower than the fees associated with the Fund. Fund operating expenses may reflect the benefit of a commission recapture program. Fee waivers of 0.00% are in place for this Fund. Actual performance shown reflects the imposition of the foregoing expenses and the benefit of any fee waivers or commission recaptures.

The Funds commenced operations on 06/30/2009, which is the date that (1) the Fund began operations in accordance with the Fund’s investment objective, and (2) QMA began calculating daily unit values for the Fund.

Although the Fund commenced operations on 06/30/2009, the Fund did not receive initial funding from investor plans until the applicable Funding Date listed in the “Key Facts” table. Prior to the applicable Funding Date, PRIAC calculated daily unit values based on the performance of the Underlying Funds in the fund-of-funds structure, weighted in accordance with the asset allocation of each of the Underlying Funds.

The performance track record reflects annual ratcheting along the Fund’s Glidepath as well as daily rebalancing prior to January 2, 2015 and Monthly/Tolerance Based Rebalancing effective January 2, 2015. The performance track record for each Fund also reflects the 0.72% management fee and other expenses of the Fund actually incurred (which vary from year to year). Unlike the results shown in the performance record beginning with a Fund’s Funding Date, performance prior to the Funding Date does not represent actual investment by the Fund in the Underlying Funds. If the Fund had actually invested in the Underlying Funds prior to the applicable Funding Date, it is possible that the performance of the Underlying Funds could have been different and the expenses of the Fund could have been higher, each of which could have affected performance of the Fund.

Performance Risks. Before investing, investors should carefully consider the investment objectives, risks, charges and expenses of this Fund and other plan investment options. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month end, please call 1-877-778-2100. It is possible to lose money investing in securities.

Possibility of Contract Charges. Your retirement plan may have agreed to contract charges. If so, these would reduce the performance (and possibly the Morningstar rating) shown above. Any contract charges are included in the expense ratio shown in your statement and in the performance record. The Plan fees and contract charges compensate us for the distribution and servicing associated with your plan. Other plan investment options may generate more or less revenue for us than the fees associated with this Fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other plans investing in the Fund may have lower fees, but these are not available to your plan in order to compensate us for distribution and plan servicing.
Glidepath and asset allocations are as of the calendar quarter referenced above. The asset allocation changes over time. PRIAC, together with QMA, may change the Glidepath, asset allocations and Underlying Funds.

**Additional Description Continued:** The current daily rebalancing frequency is a combination of monthly and tolerance-based rebalancing. At every month end, each Fund will automatically rebalance to its target allocations (as then in effect) with respect to the underlying funds in which the Fund is invested (the “Underlying Funds,” or each an “Underlying Fund”). In addition, each Fund will be evaluated daily with respect to its target allocations to the Underlying Funds. If market movements cause any Underlying Fund to deviate more than 5% relative to the target allocation to such Underlying Fund, there will be an automatic rebalancing of that Underlying Fund and any such other Underlying Funds as may be necessary to return all Underlying Funds to their respective target allocations as then in effect.

**Performance Information Continued:** Please note that the performance information reflects the changes made to the Underlying Funds as of the date the Funds made the change. The following changes are reflected in the performance track record of each Fund (as applicable):
- On September 22, 2010, the QMA Small Cap Blend Enhanced Index Fund sleeve was replaced by the Jennison Small Cap Core Equity Fund.
- On December 7, 2011, the Bache Commodities Total Return Fund sleeve was replaced with the Jefferies Commodity Strategies Fund.

**The Separate Account:** Your retirement plan purchases units of a Separate Account established and made available as an investment option under group variable annuity contracts issued by Prudential Retirement Insurance and Annuity Company (“PRIAC”), Hartford CT. The Separate Account holds the investment securities, and associated voting rights belong to the Separate Account. Pursuant to CFTC Rule 4.5, PRIAC has claimed an exclusion from registration as a commodity pool operator with respect to the Fund. As defined in ERISA Section 3(39), PRIAC is the “investment manager” with respect to the Separate Account.

**Miscellaneous:** Frequent exchanging of investment options may harm long-term investors. Your plan and/or the Fund may have policies to detect and deter potentially abusive exchanges. The policies may require you to modify or terminate investment exchange privileges. Benchmarks are unmanaged and cannot be invested in directly. See User Guide for benchmark definitions.

**Prudential Retirement Separate Account Fund of Funds Products**
These Funds of funds are not part of the Manager-Managers program, and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the underlying investment options. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

**Primary Benchmark:** The custom benchmark reflects the normal weighted average of the respective Day One Fund’s stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PRIREF Composite Index, the Bloomberg Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index (Series-L), the Bloomberg Barclays U.S. Aggregate Bond Index and the Citigroup Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time.

There is no assurance the objectives of the underlying separate accounts shown above will be met.

All investing involves risk and there is no guarantee the Fund’s objective will be achieved. An investment in a Day One Fund is subject to the risks of the investments of each underlying fund, which include: With respect to investment in equities, stock prices are more volatile than bond prices over the long term, and the value of such investment will fluctuate with changes in market conditions. Small- and mid-cap investments may be more volatile than large-cap investments, and investments in non-U.S. markets may be more volatile than domestic investments due to currency fluctuation and political uncertainty. Investments in emerging markets are subject to greater volatility and price declines. Fixed-income investments may fluctuate based on interest rate changes and are subject to the risk that the company may not be able to make timely payments of principal and interest. Further, TIPS may experience greater losses than other fixed-income securities with similar durations. Unique risks associated with real estate assets may cause these investments to react differently to market conditions than traditional investments. Commodities may be speculative and more volatile than investments in more traditional equity and debt securities.

**A Prudential Retirement Separate Account - Target Date Funds**

---

**Key Facts - Fund**

**Manager:** Prudential Retirement Insurance and Annuity Company (PRIAC)

**Fund Category:** Balanced-Target Date

**Primary Category:** Prudential Day One 2010 Fund

**Net Assets:** $34.6 Billion

**Inception Date:** 06/30/2009

**Funding Date:** 02/15/2013

**Net Expense Ratio (Before Contract Charges):** 0.74%

**Overall Morningstar Rating™:** 163 Overall Morningstar Rating as of quarter ending 06/30/2018

**In the past, the investment has shown a relatively small range of price fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.**

The target date is the approximate date when investors plan to retire and may begin withdrawing their money. The asset allocation of the target date funds will become more conservative as the target date approaches and for ten years after the target date by lessening the equity exposure and increasing the exposure in fixed income investments. The principal value of an investment in a target date fund is not guaranteed at any time, including the target date. There is no guarantee that the fund will provide adequate retirement income. A target date fund should not be selected based solely on age or retirement date. Participants should carefully consider the investment objectives, risks, charges and expenses of any Fund before investing. Funds are not guaranteed investments and the stated asset allocation may be subject to change. It is possible to lose money by investing in securities, including losses near and following retirement.

---

**Account Note:** Effective close of business on 3/29/2018, Quantitative Management Associates, LLC (aka “QMA”) replaced CoreCommodity Management, LLC as the investment manager of the corresponding underlying fund which will be consequently renamed as the QMA Commodity Strategy Fund. The Prudential Day One Funds’ annual management fees were reduced by 0.02% concurrent with the manager change. Due to the event’s timing, fee and underlying fund name displayed on this document will reflect said changes starting with 06/30/2018 publication.

---

**Description/Objective**

The Prudential Day One® 2010 Fund (the “Fund”) is a member of the Prudential Day One Funds (the “Funds”). They include Funds managed to specific target dates offered in five-year intervals through the year 2060, as well as Day One Income Fund. The Day One Income Fund is designed for retirees or individuals with a current income. The target date Funds are designed for participants planning to retire in or near the target year. In addition to anticipated retirement date, however, relevant factors for target date Fund selection may include age, risk tolerance, other investments owned and planned withdrawals. The Funds are available for investment by certain retirement, pension and profit-sharing plans and other eligible investors. The Funds are designed to provide a mix of traditional and non-traditional asset classes. Each Fund is a “fund of funds” that will invest in other pooled investment vehicles, including insurance company separate accounts, collective investment funds and/or mutual funds (the “Underlying Funds”).

The asset allocation strategy and Glidepath of each target date Fund are intended to maximize the potential that the participant’s account balance will provide a source of retirement income. The Day One Income Fund’s asset allocation, with its goal of providing current income, does not progress along a Glidepath. The investment objective of each Fund is to perform consistent with its custom blended benchmark over a full market cycle. There is no guarantee, however, that any Fund will meet its investment objective or provide a source of retirement income.

Quantitative Management Associates LLC (“QMA”), an SEC-registered investment adviser and a Prudential Financial, Inc. company, has been engaged by PRIAC to provide certain asset allocation and other investment advice relating to the operation of the Funds. QMA’s asset allocation outlook will be incorporated into the Funds’ Glidepath and Underlying Fund allocations, subject to the constraints mentioned below.

**The Prudential Day One® 2010 Fund:**

- Invests in multiple Underlying Funds, with the bond/stock & non-traditional weightings determined by the Glidepath (For specific asset class mixes by Fund, refer to the “Asset Class Mixchart.”)
- Is rebalanced to maintain the predetermined asset allocation mix dictated by the Glidepath among the Underlying Funds. While each Fund is invested in a number of Underlying Funds, the component results are aggregated to produce one all-inclusive return. The performance benchmarks are a pro rata combination of the benchmarks for each Fund’s underlying asset classes, based on the asset allocation for the Fund.
- Is “ratcheted” annually in January to account for the Glidepath, except for the Prudential Day One Income Fund, which maintains an asset allocation that is described below. This adjustment to the investment mix is a fundamental feature of the Prudential Day One Funds, which are designed to grow more conservative over time as they move along the Glidepath. Each target date Fund’s asset allocations follow a Glidepath that will become more conservative as the year that is the Fund’s target date approaches (and for the following ten years), by lessening equity investment exposure and increasing exposure to fixed income investments. Ten years after the target date and continuing thereafter, the asset allocation of each Fund will be similar to the Prudential Day One Income Fund, currently approximately 25% of the Fund allocated to equity and non-traditional investments, and approximately 65% allocated to fixed income investments.
- Is expected to have the same management fee as it moves along its Glidepath.
- Is reviewed periodically by PRIAC and QMA to determine whether the Glidepath and the Underlying Funds of the target-date and income Funds remain suitable to meet the Fund’s investment objectives. As a result of this review, QMA may modify the Glidepath, asset allocations and/or Underlying Funds. Management fees will not increase as a result of changes to the Glidepath, allocations, or changes to the Underlying Funds.

**See Additional Description Continued on page 2**

**There is no assurance the objectives will be met.**

**# of Funds in Category** 163

**Morningstar Rating™** as of 06/30/2018

---

**Fund Fees Reflect in Performance**

*Prudential Day One® 2010 Fund* performance includes 0.72% management expenses. Other expenses for the Fund for the prior calendar year were 0.82%. Fees and expenses may vary, and they may be higher or lower in the future. Such Fund operating expenses may reflect the benefit of a commission recapture program. Fee waivers of 0.00% are in place for this Fund. Actual performance shown reflects the imposition of interest expenses of 0.72% applicable to the Fund.

The Fund commenced operations on 06/30/2009, which is the date that (1) the Fund began operations in accordance with the allocations dictated by the Funds’ Glidepath, and (2) PRIAC began calculating daily unit values for the Funds. Although the Fund commenced operations on 06/30/2009, the Fund did not receive initial funding from investor plans until the applicable Funding Date listed in the “Key Facts” table. Prior to the applicable Funding Date, PRIAC calculated daily unit values based on the performance of the Underlying Funds in the fund-of-funds structure, weighted in accordance with the asset allocation of each Underlying Fund as specified by the Fund’s Glidepath.

The performance track record reflects annual ratcheting along the Fund’s Glidepath as well as daily rebalancing prior to January 2, 2015 and Monthly/Quarterly Based Rebalancing effective January 2, 2015. The performance track record for each Fund also reflects the 0.72% management fee and the other expenses of the Fund actually incurred (which vary from year to year). Unlike the results shown in the performance record beginning with a Fund’s Funding Date, performance prior to the Funding Date does not represent actual investment by the Fund in the Underlying Funds. If the Fund had actually invested in the Underlying Fund prior to the applicable Funding Date, it is possible that the performance of the Underlying Funds could have been different and the expenses of the Fund could have been different, each of which could have affected performance of the Fund.

**Performance Risks:** Before investing, investors should carefully consider the investment objectives, risks, charges and expenses of this Fund and other plan investment options. The investment value and return will fluctuate so that an investment, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month end, please call 1-877-778-2100. It is possible to lose money investing in securities.

---

**Possible and Contract Charges:** Your retirement plan may have agreed to contract charges. If so, these would reduce the performance (and possibly the Morningstar ratings) shown above. Any contract charges are included in the expense ratio shown in your statement and in the performance shown in your statement. The Fund fees and contract charges compensate us for the distribution and servicing associated with your plan. Other plan investment options may generate more or less revenue for us than the fees associated with this Fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other plans investing in the Fund may have lower fees, but these are not available to your plan in order to compensate us for distribution and plan servicing.
Glidepath and asset allocations are as of the calendar quarter referenced above. The asset allocation changes over time. PRIAC, together with QMA, may change the Glidepath, asset allocations and Underlying Funds.

GLIDEPATH

Additional Description Continued: The current daily rebalancing frequency is a combination of monthly and tolerance-based rebalancing. At every month end, each Fund will automatically rebalance to its target allocations (as then in effect) with respect to the underlying funds in which the Fund is invested (the "Underlying Funds," or each an "Underlying Fund"). In addition, each Fund will be evaluated daily with respect to its target allocations to the Underlying Funds. If market movements cause any Underlying Fund to deviate more than 5% relative to the target allocation to such Underlying Fund, there will be an automatic rebalancing of that Underlying Fund and any such other Underlying Funds as may be necessary to return all Underlying Funds to their respective target allocations as then in effect.

Performance Information Continued: Please note that the performance information reflects the changes made to the Underlying Funds as of the date the Funds made the change. The following changes are reflected in the performance track record of each Fund (as applicable):

- On September 22, 2010, the QMA Small Cap Blend Enhanced Index Fund sleeve was replaced by the Jennison Small Cap Core Equity Fund.
- On December 7, 2010, the Bache Commodity Total Return Fund sleeve was replaced with the Jefferies Commodity Strategies Fund. Subsequently, on April 16, 2012, the Jefferies Commodity Strategies Fund changed its name to the CoreCommodity Strategies Fund.

The Separate Account: Your retirement plan purchases units of a Separate Account established and made available as an investment option under group variable annuity contracts issued by Prudential Retirement Insurance and Annuity Company (“PRIAC”), Hartford CT. The Separate Account holds the investment securities, and associated voting rights belong to the Separate Account. Pursuant to CFTC Rule 4.5, PRIAC has claimed an exclusion from registration as a commodity pool operator with respect to the Fund. As defined by ERISA Section 3(38), PRIAC is the “investment manager” with respect to the Separate Account.

Frequent exchanging of investment options may harm long-term investors. Your plan and/or the Fund may have policies to detect and deter potentially abusive exchanges. The policies may require you to modify or terminate investment exchange privileges. Benchmarks are unmanaged and cannot be invested in directly. See User Guide for benchmark definitions.

Prudential Retirement Separate Account Fund of Funds Products: These Fund of funds are not part of the Manager-of-Managers program, and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the underlying investment options. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

Primary Benchmark: The custom benchmark reflects the normal weighted average of the respective Day One Fund’s stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodity Index, the PRREF Composite Index, the Bloomberg Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index (Series-L), the Bloomberg Barclays U.S. Aggregate Bond Index and the Citigroup Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time.

There is no assurance the objectives of the underlying separate accounts shown above will be met. All investing involves risk and there is no guarantee the Fund’s objective will be achieved. An investment in a Day One Fund is subject to the risks of the investments of each underlying fund, which include: With respect to investment in equities, stock prices are more volatile than bond prices over the long term, and the value of such investment will fluctuate with changes in market conditions. Small- and mid-cap investments may be more volatile than large-cap investments, and investments in non-U.S. markets may be more volatile than domestic investments due to currency fluctuation and political uncertainty. Investments in emerging markets are subject to greater volatility and price declines. Fixed-income investments may fluctuate based on interest rate changes and are subject to the risk that the company may not be able to make timely payments of principal and interest. Further, TIPS may experience greater losses than other fixed-income securities with similar durations. Unique risks associated with real estate and commodities may cause these investments to react differently to market conditions than traditional investments. Commodities may be speculative and more volatile than investments in more traditional equity and debt securities.

The Prudential Day One® 2030 Fund (the “Fund”) is a member of the Prudential Day One Funds (the “Funds”), a suite of multi-asset class funds (the “Underlying Funds”). They include Funds managed to specific target dates offered in five-year intervals through the year 2060, as well as a Day One Income Fund. The Day One Income Fund is designed for retirement or individuals with no current income. The target date Funds are designed for participants planning to retire in or near the target year. In addition to anticipated retirement date, however, relevant factors for target date Fund selection may include age, risk tolerance, other investments owned, and planned sequencing. The Funds are available for investment by certain retirement, pension and profit-sharing plans and other eligible investors.

The Funds are designed to provide a mix of traditional and non-traditional asset classes. Each Fund is a “fund of funds” that will invest in other pooled investment vehicles, including insurance company separate accounts, collective investment funds and/or mutual funds (the “Underlying Funds”). The asset allocation strategy and Glidepath of each target date Fund are intended to maximize the potential that the account participant’s balance will provide a source of retirement income. The Day One Income Fund’s asset allocation, with its goal of providing current income, does not progress along a Glidepath. The investment objective of each Fund is to perform consistent with its custom blended benchmark over a full market cycle. There is no guarantee, however, that any Fund will meet its investment objective or provide a source of retirement income.

Quantitative Management Associates LLC (“QMA”), an SEC-registered investment adviser and a Prudential Financial, Inc. company, has been engaged by PRIAC to provide certain asset allocation and other investment advice relating to the operation of the Funds. QMA’s asset allocation outlook will be incorporated into the Funds’ Glidepath and Underlying Fund allocations, subject to the constraints mentioned below.

The Prudential Day One® 2030 Fund:

- invests in multiple Underlying Funds, with the bond/stock & non-traditional weightings determined by the Glidepath (for specific asset class mixes by Fund, refer to the “Asset Class Mix” chart).
- is rebalanced to maintain the predefined asset allocation mix dictated by the Glidepath among the Underlying Funds. While each Fund is invested in a number of Underlying Funds, the component results are aggregated to produce one all-inclusive return. The performance benchmarks are a pro rata combination of the benchmarks for each Fund’s underlying asset classes, based on the asset allocation for the Fund.
- is “ratcheted” annually in January of each year, except for the Prudential Day One Income Fund, which maintains an asset allocation that is described below. This adjustment to the investment mix is a fundamental feature of the Prudential Day One Funds, which are designed to grow more conservative over time as they move along the Glidepath. Each target date Fund’s asset allocations follow a Glidepath that will become more conservative as the year is the Fund’s target date approaches (and for the following ten years), by lessening equity investment exposure and increasing exposure to fixed income investments. Ten years after the target date and continuing thereafter, the asset allocation of each Fund will be similar to the Prudential Day One Income Fund, currently approximately 25% of the Fund allocated to equity and non-traditional investments, and approximately 65% allocated to fixed income investments.
- is expected to have the same management fee as it moves along its Glidepath.
- is reviewed periodically by PRIAC and QMA to determine whether the Glidepath and the Underlying Funds of the target-date and income funds remain suitable to meet the Fund’s investment objectives. As a result of this review, PRIAC may modify the Glidepath, asset allocations and/or Underlying Funds. Management fees will not increase as a result of changes to the Glidepath, allocations, or changes to the Underlying Funds.

See Adjunct Description on page 2. There is no assurance the objectives will be met.

**Performance Objectives**

- Invests in multiple Underlying Funds, with the bond/stock & non-traditional weightings determined by the Glidepath (for specific asset class mixes by Fund, refer to the “Asset Class Mix” chart).
- Is rebalanced to maintain the predefined asset allocation mix dictated by the Glidepath among the Underlying Funds. While each Fund is invested in a number of Underlying Funds, the component results are aggregated to produce one all-inclusive return. The performance benchmarks are a pro rata combination of the benchmarks for each Fund’s underlying asset classes, based on the asset allocation for the Fund.
- Is “ratcheted” annually in January of each year, except for the Prudential Day One Income Fund, which maintains an asset allocation that is described below. This adjustment to the investment mix is a fundamental feature of the Prudential Day One Funds, which are designed to grow more conservative over time as they move along the Glidepath. Each target date Fund’s asset allocations follow a Glidepath that will become more conservative as the year is the Fund’s target date approaches (and for the following ten years), by lessening equity investment exposure and increasing exposure to fixed income investments. Ten years after the target date and continuing thereafter, the asset allocation of each Fund will be similar to the Prudential Day One Income Fund, currently approximately 25% of the Fund allocated to equity and non-traditional investments, and approximately 65% allocated to fixed income investments.
- Is expected to have the same management fee as it moves along its Glidepath.
- Is reviewed periodically by PRIAC and QMA to determine whether the Glidepath and the Underlying Funds of the target-date and income funds remain suitable to meet the Fund’s investment objectives. As a result of this review, PRIAC may modify the Glidepath, asset allocations and/or Underlying Funds. Management fees will not increase as a result of changes to the Glidepath, allocations, or changes to the Underlying Funds.

See Adjunct Description on page 2. There is no assurance the objectives will be met.

**Fund Facts Reflect in Performance**

Prudential Day One® 2030 Fund expenses include 0.72% management expenses. Other expenses for the Fund for the prior calendar year were 0.02%. Fees and expenses may vary, and they may be lower or higher in the future. Such Fund operating expenses may reflect the benefit of a commission recapture program. Fee waivers of 0.00% are in place for this Fund. Actual performance shown reflects the imposition of the 0.72% management fee and the other expenses of the Fund actually incurred (which vary from year to year). Unlike the results shown in the performance record beginning with a Fund’s Funding Date, performance prior to the Funding Date does not represent actual investment by the Fund in the Underlying Funds. If the Fund had actually invested in the Underlying Fund prior to the applicable Funding Date, it is possible that the performance of the Underlying Funds could have been different and the expenses of the Fund could have been different, each of which could have affected performance of the Fund.
Glidepath and asset allocations are as of the calendar quarter referenced above. The asset allocation changes over time. PRIAC, together with QMA, may change the Glidepath, asset allocations and Underlying Funds.

**Performance Information Continued:** Please note that the performance information reflects the changes made to the Underlying Funds as of the date the Funds made the change. The following changes are reflected in the performance track record of each Fund as of May 31, 2018 (as applicable):

- On September 22, 2010, the QMA Small Cap Blend Enhanced Index Fund sleeve was replaced by the Jennison Small Cap Core Equity Fund.
- On December 7, 2011, the Bache Commodity Total Return Fund sleeve was replaced with the Jefferies Commodity Strategies Fund. Subsequently, on April 16, 2012, the Jefferies Commodity Strategies Fund changed its name to the CoreCommodity Strategies Fund.

**The Separate Account:** Your retirement plan purchases units of a Separate Account established and made available as an investment option under group variable annuity contracts issued by Prudential Retirement Insurance and Annuity Company (“PRIAC”), Hartford CT. The Separate Account holds the investment securities, and associated voting rights belong to the Separate Account. Pursuant to CFC Rule 4.5, PRIAC has claimed an exclusion from registration as a commodity pool operator with respect to the funds. As defined by ERISA Section 3(38), PRIAC is the “investment manager” with respect to the Separate Account.

**Miscellaneous:** Frequent exchanging of investment options may harm long-term investors. Your plan and/or the Fund may have policies to detect and deter potentially abusive exchanges. The policies may require you to modify or terminate investment exchange privileges. Benchmarks are unmanaged and cannot be invested in directly. See User Guide for benchmark definitions.

**Prudential Retirement Separate Account Fund of Funds Products:** These Funds of Funds are not part of the Manager-of-Managers program, and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the underlying investment options. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

**Primary Benchmark:** The custom benchmark reflects the normal weighted average of the respective Day One Fund’s stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PRREF Composite Index, the Bloomberg Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index (Series-L), the Bloomberg Barclays U.S. Aggregate Bond Index and the Citi Group Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time.

There is no assurance the objectives of the underlying separate accounts shown above will be met.

All investing involves risk and there is no guarantee the Fund’s objective will be achieved. An investment in a Day One Fund is subject to the risks of the investments of each underlying fund, which include: With respect to investment in equities, stock prices are more volatile than bond prices over the long term, and the value of such investment will fluctuate with changes in market conditions. Small- and mid-cap investments may be more volatile than large-cap investments, and investments in non-U.S. markets may be more volatile than domestic investments due to currency fluctuation and political uncertainty. Investments in emerging markets are subject to greater volatility and price declines. Fixed-income investments may fluctuate based on interest rate changes and are subject to the risk that the company may not be able to make timely payments of principal and interest. Further, TIPS may experience greater losses than other fixed-income securities with similar durations. Unique risks associated with real estate and commodities may cause these investments to react differently to market conditions than traditional investments. Commodities may be speculative and more volatile than investments in more traditional equity and debt securities.

A Prudential Retirement Separate Account - Target Date Funds

Key Facts - Fund

MANAGER: Prudential Retirement Insurance and Annuity Company (PRIAC)

FUND CATEGORY: Balanced-Target Date

PRIMARY BENEFiciary: Prudential Day One 2040 Fund Benchmark

NET ASSETS: $152.2 Million

INCEPTION DATE: 06/30/2009

FUNDING DATE: 08/01/2013

NET EXPENSE RATIO (Before Contract Charges): 0.74%

OVERALL MORNINGSTAR RATING™: ★★★★★

OVERALL # OF FUNDS IN MORNINGSTAR CATEGORY: 193

Overall Morningstar Rating as of quarter ending 06/30/2018. The Morningstar Rating is based on return and risk of a fund. In the past, the investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio make-ups or investment strategies.

The target date is the approximate date when investors plan to retire and may begin withdrawing their money. The asset allocation of the target date funds will become more conservative as the target date approaches and for ten years after the target date by lessening the equity exposure and increasing the exposure in fixed income investments. The principal value of an investment in a target date fund is not guaranteed at any time, including the target date. There is no guarantee that the fund will provide adequate retirement income. A target date fund should not be selected based solely on age or retirement date. Participants should carefully consider the investment objectives, risks, charges and expenses of a fund before investing. Funds are not guaranteed investments and the stated asset allocation may be subject to change. It is possible to lose money by investing in securities, including losses near and following retirement.

Account Note: Effective close of business on 3/29/2018, Quantitative Management Associates, LLC (aka “QMA”) replaced CoreCommodity Management, LLC as the investment manager of the corresponding underlying fund which will be consequently renamed as the QMA Commodity Strategy Fund. The Prudential Day One Funds’ annual management fees will be reduced by 0.02% concurrent with the manager change. Due to the event’s timing, fee and underlying fund name displayed on this document will reflect said changes starting with 2Q18 publication.

DESCRIPTION/OBJECTIVE

The Prudential Day One® 2040 Fund (the "Fund") is a member of the Prudential Day One Funds (the "Funds"). They include Funds managed to specific target dates offered in five-year intervals through the year 2080, as well as a Day One Income Fund. The Day One funds are designed for individuals with near-term retirement income. The target date Funds are designed for participants planning to retire in or near the target year. In addition to anticipated retirement date, however, relevant factors for target date Fund selection may include age, risk tolerance, other investments owned, and planned withdrawals. The Funds are available for investment by certain retirement, pension and profit-sharing plans and other eligible investors.

The Funds are designed to provide a mix of traditional and non-traditional asset classes. Each Fund is a “fund of funds” that will invest in a pool of Underlying Funds, including insurance company separate accounts, collective investment funds and/or mutual funds (the “Underlying Funds”). The asset allocation strategy and Glidepath of each target date Fund are intended to maximize the potential that the participant’s account balance will provide a source of retirement income. The Day One Income Fund’s asset allocation, with its goal of providing current income, does not progress along a Glidepath. The investment objective of each Fund is to perform consistent with its custom blended benchmark over a full market cycle. There is no guarantee, however, that any Fund will meet its investment objective or provide a source of retirement income.

Quantitative Management Associates LLC (“QMA”), an SEC-registered investment adviser and a Prudential Financial, Inc. company, has been engaged by PRIAC to provide certain asset allocation and other investment advice relating to the operation of the Funds. QMA’s asset allocation outlook will be incorporated into the Funds’ Glidepath and Underlying Fund allocations, subject to the constraints mentioned below.

The Prudential Day One® 2040 Fund:
- Invests in multiple Underlying Funds, with the bond/stock & non-traditional weightings determined by the Glidepath (For specific asset class mixes by Fund, refer to the "Asset Class Mix chart.")
- Is rebalanced to maintain the predetermined asset allocation mix dictated by the Glidepath among the Underlying Funds.
- While each Fund is invested in a number of Underlying Funds, the component results are aggregated to produce one all-inclusive return. The performance benchmarks are a pro rata combination of the benchmarks for each Fund’s underlying asset classes, based on the asset allocation for the Fund.
- Is “ratcheted” annually in January in accordance with the Glidepath, except for the Prudential Day One Income Fund, which maintains an asset allocation that is described below. This adjustment to the investment mix is a fundamental feature of the Prudential Day One Funds, which are designed to grow more conservative over time as they move along the Glidepath. Each target date Fund’s asset allocation follows a Glidepath that will become more conservative as the year that is the Fund’s target date approaches (and for the following ten years), by lessening equity investment exposure and increasing exposure to fixed income investments. Ten years after the target date and continuing thereafter, the asset allocation of each Fund will be similar to the Prudential Day One Income Fund, currently approximately 26% of the Fund allocated to equity and non-traditional investments, and approximately 65% allocated to fixed income investments.
- Is expected to have the same management fee as it moves along its Glidepath.
- Is reviewed periodically by PRIAC and QMA to determine whether the Glidepath and the Underlying Funds of the target-date and income funds remain suitable to meet the Fund’s investment objectives. As a result of this review, QMA may modify the Glidepath, asset allocations and/or Underlying Funds. Management fees will not increase as a result of changes to the Glidepath, allocations, or changes to the Underlying Funds.

See Performance Continued on page 2.

There is no assurance the objectives will be met.

Morningstar Rating™

# of Funds in Category: 193

MORNINGSTAR CATEGORY: Low Moder ate High

The performance track record reflects actual annual tracking along the Fund’s Glidepath as well as daily rebalancing prior to January 2, 2015 and Monthly/Tolerance Based Rebalancing effective January 2, 2015. The performance track record for each Fund also reflects the 0.72% management fee and the other expenses of the Fund actually incurred (which vary from year to year). Unlike the results shown in the performance record beginning with a Fund’s Funding Date, performance prior to the Funding Date does not represent actual investment by the Fund in the Underlying Fund. If the Fund had actually invested in the Underlying Fund prior to the applicable Funding Date, it is possible that the performance of the Underlying Fund could have been different and the expenses of the Fund could have been different, each of which could have affected performance of the Fund.

Performance Risks. Before investing, investors should carefully consider the investment objectives, risks, charges and expenses of this Fund and other plan investment options. The investment value and return will fluctuate so that an investor's account balance may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month end, please call 1-877-778-2100. It is possible to lose money investing in securities.

Possible of Contract Charges. Your retirement plan may have agreed to contract charges. If so, these would reduce the performance (and possibly the Morningstar ratings) shown above. Any contract charges are included in the expense ratio shown in your statement and in the performance shown in your statement. The Fund fees and contract charges compensate us for the distribution and servicing associated with your plan. Other plan investment options may generate more or less revenue for us than the fees associated with this Fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other plans investing in the Fund may have lower fees, but these are not available to your plan in order to compensate us for distribution and plan servicing.
A Prudential Retirement Separate Account - Target Date Funds

Asset Class Mix

Glidepath and asset allocations are as of the calendar quarter referenced above. The asset allocation changes over time. PRIAC, together with QMA, may change the Glidepath, asset allocations and Underlying Funds.

Performance Information Continued:

- Please note that the performance information reflects the changes made to the Underlying Funds as of the date the Funds made the change. The following changes are reflected in the performance track record of each Fund (as applicable):
  - On September 22, 2010, the QMA Small Cap Blend Enhanced Index Fund sleeve was replaced by the Jennison Small Cap Core Equity Fund.
  - On December 7, 2011, the Bache Commodities Total Return Fund sleeve was replaced with the Jefferies Commodity Strategies Fund. Subsequently, on April 16, 2012, the Jefferies Commodity Strategies Fund changed its name to the CoreCommodity Strategies Fund.

Primary Benchmark:

- The custom benchmark reflects the normal weighted average of the respective Day One Fund’s stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PRREF Composite Index, the Bloomberg Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index (Series-L), the Bloomberg Barclays U.S. Aggregate Bond Index and the Citigroup Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time.

Additional Description Continued:

- All investing involves risk and there is no guarantee the Fund’s objective will be achieved. An investment in a Day One Fund is subject to the risks of the investments of each underlying fund, which include: With respect to investment in equities, stock prices are more volatile than bond prices over the long term, and the value of such investment will fluctuate with changes in market conditions. Small- and mid-cap investments may be more volatile than large-cap investments, and investments in non-U.S. markets may be more volatile than domestic investments due to currency fluctuation and political uncertainty. Investments in emerging markets are subject to greater volatility and price declines. Fixed-income investments may fluctuate based on interest rate changes and are subject to the risk that the company may not be able to make timely payments of principal and interest. Further, TIPS may experience greater losses than other fixed-income securities with similar durations. Unique risks associated with real estate and commodities may cause these investments to react differently to market conditions than traditional investments. Commodities may be speculative and more volatile than investments in more traditional equity and debt securities.

**DESCRIPTION/OBJECTIVE**

The Prudential Day One® 2050 Fund (the “Fund”) is a member of the Prudential Day One Funds (the “Funds”), a suite of multi-class asset classes of the Funds). They include Funds managed to specific target dates offered in five-year intervals through the year 2050, as well as the Day One Income Fund. The Day One Funds is designed for individuals who intend to retire in or near the target year. The target date Funds are designed for participants planning to retire in or near the target year. In addition to anticipated retirement date, however, relevant factors for target date fund selection may include age, risk tolerance, other investment owned, and planned financial goals. The Funds are available for investment by certain retirement, pension and profit-sharing plans and other eligible investors. The Funds are designed to provide a mix of traditional and non-traditional asset classes. Each Fund is a “fund of funds” that will invest in several pooled investment programs, including insurance company separate accounts, collective investment funds and/or mutual funds (the “Underlying Funds”). The asset allocation strategy and Glidepath of each target date Fund are intended to maximize the potential that the participant’s account balance will provide a source of retirement income. The Day One Income Fund’s asset allocation, with its goal of providing current income, does not progress along a Glidepath. The investment objective of each Fund is to perform consistent with its custom blended benchmark over a full market cycle. There is no guarantee, however, that any Fund will meet its investment objective or provide a source of retirement income.

Quantitative Management Associates LLC (“QMA”), an SEC-registered investment adviser and a Prudential Financial, Inc. company, has been engaged by PRIAC to provide certain asset allocation and other investment advice relating to the operation of the Funds. QMA’s asset allocation outlook will be incorporated into the Funds’ Glidepath and Underlying Fund allocations, subject to the constraints mentioned below.

**The Prudential Day One® 2050 Fund:**

- Invests in multiple Underlying Funds, with the bond/stock & non-traditional weightings determined by the Glidepath (for specific asset class mixes by Fund, refer to the “Asset Class Mix” chart).
- Is rebalanced to maintain the predetermined asset allocation mix dictated by the Glidepath among the Underlying Funds.
- While each Fund is invested in a number of Underlying Funds, the component results are aggregated to produce one all-inclusive return. The performance benchmarks are a pro rata combination of the benchmarks for each Fund’s underlying asset classes, based on the asset allocation for the Fund.
- Also “ratcheted” annually in January in accordance with the Glidepath, except for the Prudential Day One Income Fund, which maintains an asset allocation that is described below. This adjustment to the investment mix is a fundamental feature of the Prudential Day One Funds, which are designed to grow more conservative over time as they move along the Glidepath. Each target date Fund’s asset allocations follow a Glidepath that will become more conservative as the year that is the Fund’s target date approaches (and for the following ten years), by lessening equity investment exposure and increasing exposure to fixed income investments. Ten years after the target date and continuing thereafter, the asset allocation of each Fund will be similar to the Prudential Day One Income Fund, currently approximately 25% of the Fund allocated to equity and non-traditional investments, and approximately 65% allocated to fixed income investments.
- Is expected to have the same management fee as it moves along its Glidepath.
- Is reviewed periodically by PRIAC and QMA to determine whether the Glidepath and the Underlying Funds of the target-date and income funds remain suitable to meet the Fund’s investment objectives. As a result of this review, QMA may modify the Glidepath, asset allocations and/or Underlying Funds. Management fees will not increase as a result of changes to the Glidepath, allocations, or changes to the Underlying Funds.

See Acronym and Abbreviation Explanations on page 2.

In the past, this investment has shown a relatively moderate range of price fluctuations relative to other investments. This investment may experience larger or smaller price declines or price increases depending on market conditions. Some of this risk may be offset by owning other investments with different portfolio make-ups or investment strategies.

**Performance Information Continued:** Please note that the performance information reflects the changes made to the Underlying Funds as of the date the Funds made the change. The following changes are reflected in the performance track record of each Fund (as applicable):

- On September 22, 2010, the QMA Small Cap Blend Enhanced Index Fund sleeve was replaced by the Jennison Small Cap Core Equity Fund.
- On December 7, 2011, the Bache Commodities Total Return Fund sleeve was replaced with the Jefferies Commodity Strategies Fund.
- Subsequently, on April 16, 2012, the Jefferies Commodity Strategies Fund changed its name to the CoreCommodity Strategies Fund.

**The Separate Account:** Your retirement plan purchases units of a Separate Account established and made available as an investment option under group variable annuity contracts issued by Prudential Retirement Insurance and Annuity Company (“PRIAC”), Hartford, CT. The Separate Account holds the investment securities, and associated voting rights belong to the Separate Account. Pursuant to CFTC Rule 4.5, PRIAC has claimed an exclusion from registration as a commodity pool operator with respect to the Fund. As defined by ERISA Section 3(38), PRIAC is the “investment manager” with respect to the Separate Account.

**Mandatory Policies:** Frequent exchanging of investment options may harm long-term investors. Your plan and/or the Fund may have policies to detect and deter potentially abusive exchanges. The policies may require you to modify or terminate investment exchange privileges. Benchmarks are unmanaged and cannot be invested in directly. See User Guide for benchmark definitions.

**Prudential Retirement Separate Account Fund of Funds Products:** These Fund of funds are not part of the Manager-of-Managers program, and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the underlying investment options. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

**Primary Benchmark:** The custom benchmark reflects the normal weighted average of the respective Day One Fund’s stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the Bloomberg Barclays U.S. Aggregate Bond Index and the Citigroup Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index.

Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time.

There is no assurance the objectives of the underlying separate accounts shown above will be met.

**All investing involves risk and there is no guarantee the Fund’s objective will be achieved.** An investment in a Day One Fund is subject to the risks of the investments of each underlying fund, which include: With respect to investment in equities, stock prices are more volatile than bond prices over the long term, and the value of such investment will fluctuate with changes in market conditions. Small and mid-cap investments may be more volatile than large-cap investments, and investments in non-U.S. markets may be more volatile than domestic investments due to currency fluctuation and political uncertainty. Investments in emerging markets are subject to greater volatility and price declines. Fixed-income investments may fluctuate based on interest rate changes and are subject to the risk that the economy may not be able to make timely payments on principal and interest. Further, TIPS may experience greater losses than other fixed-income securities with similar durations. Unique risks associated with real estate and commodities may cause these investments to react differently to market conditions than traditional investments. Commodities may be speculative and more volatile than investments in more traditional equity and debt securities.

© 2018 Prudential Financial, Inc. and its related entities. Prudential, the Prudential logo, the Rock symbol and Bring Your Challenges are service marks of Prudential Financial, Inc., and its related entities, registered in many jurisdictions worldwide.
The Prudential Day One® 2060 Fund (the "Fund") is a member of the Prudential Day One Funds (the "Funds"), a suite of multi-asset class funds (the "Funds"). They include Funds managed to specific target dates offered in five-year intervals through the year 2060, as well as a Day One Income Fund. The Day One Income Fund is designed for retirees or individuals who seek current income. The target date Funds are designed for participants planning to retire in or near the target year. In addition to anticipated retirement date, however, relevant factors for target date Fund selection may include age, risk tolerance, other investments owned, and planned retirement expenses. The Funds are available for investment by certain retirement, pension and profit-sharing plans and other eligible investors.

The Funds are designed to provide a mix of traditional and non-traditional asset classes. Each Fund is a "fund of funds" that will invest in other pooled investment vehicles, including insurance company separate accounts, collective investment funds and/or mutual funds (the "Underlying Funds").

The asset allocation strategy and Glidepath of each target date Fund are intended to maximize the potential that the participant’s account balance will provide a source of retirement income. The Day One Income Fund’s asset allocation, with its goal of providing current income, does not progress along a Glidepath. The investment objective of each Fund is to perform consistent with its custom blended benchmark over a full market cycle. There is no guarantee, however, that any Fund will meet its investment objective or provide a source of retirement income.

Quantitative Management Associates LLC (“QMA”), an SEC-registered investment adviser and a Prudential Financial, Inc. company, has been engaged by PRIAC to provide certain asset allocation and other investment advice relating to the operation of the Funds. QMA’s asset allocation outlook will be incorporated into the Funds’ Glidepath and Underlying Fund allocations, subject to the constraints mentioned below.

The Prudential Day One® 2060 Fund:

- Invests in multiple Underlying Funds, with the bond/stock & non-traditional weightings determined by the Glidepath (for specific asset class mixes by Fund, refer to the "Asset Class Mix chart.")
- Is rebalanced to maintain the predetermined asset allocation mix dictated by the Glidepath among the Underlying Funds. While each Fund is invested in a number of Underlying Funds, the component results are aggregated to produce one all-inclusive return. The performance benchmarks are a pro rata combination of the benchmarks for each Fund’s underlying asset classes, based on the asset allocation for the Fund.
- Is "ratcheted" annually in January to align the Glidepath, except for the Prudential Day One Income Fund, which maintains an asset allocation that is described below. This adjustment to the investment mix is a fundamental feature of the Prudential Day One Funds, which are designed to grow more conservative over time as they move along the Glidepath. Each target date Fund’s asset allocation will follow a Glidepath that will become more conservative as the year that is the Fund’s target date approaches (and for the following ten years), by lessening equity investment exposure and increasing exposure to fixed income investments. Ten years after the target date and continuing thereafter, the asset allocation of each Fund will be similar to the Prudential Day One Income Fund, currently approximately 25% of the Fund allocated to equity and non-traditional investments, and approximately 65% allocated to fixed income investments.
- Is expected to have the same management fee as it moves along its Glidepath.
- Is reviewed periodically by PRIAC and QMA to determine whether the Glidepath and the Underlying Funds of the target-date and income funds remain suitable to meet the Fund’s investment objectives. As a result of this review, PRIAC may modify the Glidepath, asset allocations and/or Underlying Funds. Management fees will not increase as a result of changes to the Glidepath, allocations, or changes to the Underlying Funds.

See Additional Description Continued on page 2.

There is no assurance the objectives will be met.

**Fund Fees Reflected in Performance.** Prudential Day One® 2060 Fund expenses include 0.72% management expense. Other expenses for the Fund prior to calendar year were 0.93%. Fees and expenses may vary, and they may be higher or lower in the future. Such Fund operating expenses may reflect the benefit of a commission recapture program applicable to the Fund. Actual performance shown reflects the imposition of the foregoing expenses and the benefit of any fee waivers or commission recaptures.

The Fund commenced operations on 05/31/2013, which is the date that (1) the Fund began operations in accordance with the allocations dictated by the Funds’ Glidepath, and (2) PRIAC began calculating daily unit values for the Funds. Although the Fund commenced operations on 05/31/2013, the Fund did not receive initial funding from investor plans until the applicable Fund Date listed in the "Key Facts" table. Prior to the applicable Fund Date, PRIAC calculated daily unit values based on the performance of the Underlying Funds in the fund-of-funds structure, weighted in accordance with the asset allocation of each Underlying Fund as specified by the Fund’s Glidepath.

The performance track record reflects annual ratcheting along the Fund’s Glidepath as well as daily rebalancing prior to January 2, 2015 and Monthly/Tolerance Based Rebalancing effective January 2, 2015. The performance track record for each Fund also reflects the 0.72% management fee and the other expenses of the Fund actually incurred (which vary from year to year). Unlike the results shown in the performance record beginning with a Fund’s Funding Date, performance prior to the Funding Date does not represent actual investment by the Fund in the Underlying Funds. If the Fund had actually invested in the Underlying Fund prior to the applicable Funding Date, it is possible that the performance of the Underlying Funds could have been different and the expenses of the Fund could have been different, each of which could have affected performance of the Fund.

**Performance Risks.** Before investing, investors should carefully consider the investment objectives, risks, charges and expenses of any Fund before deciding whether to invest in a target date fund. If a participant chooses not to participate in a target date fund, or invests in an earlier or later target date fund, the participant’s investment results may differ from a target date fund investor’s results. These differences may include lower or higher investment returns, as well as lower or higher investment fees. In addition, due to the different investment strategies selected by the Fund (for example, a Fund that seeks current income may have different investment strategies and expenses than a Fund that seeks capital appreciation), the performance and risk of a Fund may differ from the performance and risk of another Fund. A participant may choose to invest in different target date funds, which may have different results. The investment mix and related returns of a Fund may be lower or higher than the investment mix and related returns of another Fund.

**Possible Costs of Contract Charges**

Your retirement plan may have agreed to contract charges. If so, these would reduce the performance (and possibly the Morningstar ratings) shown above. Any contract charges are included in the expense ratio shown in your statement and in the performance shown in your statement. The Fund fees and contract charges compensate us for the administrative services associated with your plan. Other plan investment options may have different costs and contract charges, and they may result in lower or higher returns for us than the fees associated with this Fund. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other plans investing in the Fund may have lower fees, but these are not available to your plan in order to compensate us for distribution and plan servicing.

**Closing Note:** Effective close of business on 3/29/2018, Quantitative Management Associates, LLC (aka “QMA”)** replaced CoreCommodity Management, LLC as the investment manager of the corresponding underlying fund which will be consequently renamed as the QMA Commodity Strategy Fund. The Prudential Day One Funds’ annual management fees were reduced by 0.02% concurrent with the manager change. Due to the event’s timing, fee and underlying fund name displayed on this document will reflect said changes starting with 2018 publication.

The target date is the approximate date when investors plan to retire and may begin withdrawing their money. The asset allocation of the target date funds will become more conservative as the target date approaches and for ten years after the target date by lessening the equity exposure and increasing the exposure in fixed income investments. The principal value of an investment in a target date fund is not guaranteed at any time, including the target date. There is no guarantee that the Fund will provide adequate retirement income. A target date fund should not be selected based solely on age or retirement date. Participants should carefully consider the investment objectives, risks, charges and expenses of any Fund before investing. Funds are not guaranteed investments and the stated asset allocation may be subject to change. It is possible to lose money by investing in securities, including losses near and following retirement.

**Account Note:**
Effective close of business on 3/29/2018, Quantitative Management Associates, LLC (aka “QMA”) replaced CoreCommodity Management, LLC as the investment manager of the corresponding underlying fund which will be consequently renamed as the QMA Commodity Strategy Fund. The Prudential Day One Funds’ annual management fees were reduced by 0.02% concurrent with the manager change. Due to the event’s timing, fee and underlying fund name displayed on this document will reflect said changes starting with 2018 publication.

**Target Retirement Dates: 2058+**

Additional Description Continued: The current daily rebalancing frequency is a combination of monthly and tolerance-based rebalancing. At every month end, each Fund will automatically rebalance to its target allocations (as then in effect) with respect to the underlying funds in which the Fund is invested (the “Underlying Funds,” or each an “Underlying Fund”). In addition, each Fund will be evaluated daily with respect to its target allocations to the Underlying Funds. If market movements cause any Underlying Fund to deviate more than 5% relative to the target allocation to such Underlying Fund, there will be an automatic rebalancing of that Underlying Fund and any such other Underlying Funds as may be necessary to return all Underlying Funds to their respective target allocations as then in effect.

Performance Information Continued: Please note that the performance information reflects the changes made to the Underlying Funds as of the date the Funds made the change. The following changes are reflected in the performance track record of each Fund (as applicable):

- On September 22, 2010, the QMA Small Cap Blend Enhanced Index Fund sleeve was replaced by the Jennison Small Cap Core Equity Fund.
- On December 7, 2011, the Bache Commodities Total Return Fund sleeve was replaced with the Jefferies Commodity Strategies Fund. Subsequently, on April 16, 2012, the Jefferies Commodity Strategies Fund changed its name to the Core Commodity Strategies Fund.

The Separate Account: Your retirement plan purchases units of a Separate Account established and made available as an investment option under group variable annuity contracts issued by Prudential Retirement Insurance and Annuity Company (“PRIAC”), Hartford CT. The Separate Account holds the investment securities, and associated voting rights belong to the Separate Account. Pursuant to DTC Rule 4.5, PRIAC has claimed an exclusion from registration as a commodity pool operator with respect to the Fund. As defined by ERISA Section 3(38), PRIAC is the “investment manager” with respect to the Separate Account.

Miscellaneous: Frequent exchange of investment options may harm long-term investors. Your plan and/or the Fund may have policies to detect and deter potentially abusive exchanges. The policies may require us to modify or terminate investment exchange privileges. Benchmarks are unmanaged and cannot be invested in directly. See User Guide for benchmark definitions.

The Separate Account Fund of Funds Products: These Fund of funds are not part of the Manager-of-Managers program, and therefore, PRIAC does not assume any responsibility with respect to the selection, monitoring, or replacement of the underlying investment options. Selection or termination of the Fund on a retirement plan’s investment line-up is the sole responsibility of each retirement plan’s fiduciary.

Primary Benchmark: The custom benchmark reflects the normal weighted average of the respective Day One Fund’s stock/non-traditional assets/bond/cash allocation, as represented by the S&P 1500 Composite Index, the Russell Developed ex North America Large Cap Index, the MSCI Emerging Markets Net Dividend Index, the Bloomberg Commodities Index, the PRREF Composite Index, the Bloomberg Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index (Series-L), the Bloomberg Barclays U.S. Aggregate Bond Index and the Citigroup Three Month T-Bill. Effective January 1, 2013, the International asset class is represented in the mandate benchmark by the Russell Developed ex North America Large Cap Index, replacing the MSCI EAFE Net Dividend Index. Because the asset allocation of each Fund changes over time, the custom benchmark allocations also change over time.

There is no assurance the objectives of the underlying separate accounts shown above will be met.

All investing involves risk and there is no guarantee the Fund’s objective will be achieved. An investment in a Day One Fund is subject to the risks of the investments of each underlying Fund, which include: With respect to investment in equities, stock prices are more volatile than bond prices over the long term, and the value of such investment will fluctuate with changes in market conditions. Small- and mid-cap investments may be more volatile than large-cap investments, and investments in non-U.S. markets may be more volatile than domestic investments due to currency fluctuation and political uncertainty. Investments in emerging markets are subject to greater volatility and price declines. Fixed-income investments may fluctuate based on interest rate changes and are subject to the risk that the company may not be able to make timely payments of principal and interest. Further, TIPS may experience greater losses than other fixed-income securities with similar durations. Unique risks associated with real estate and commodities may cause these investments to react differently to market conditions than traditional investments. Commodities may be speculative and more volatile than investments in more traditional equity and debt securities.
