

# 2017 Lab Corp Instruction Sheet

Includes two biometric screenings:

- Lipid Panel – **NEW – REQUIRES FASTING FROM 8-12 HOURS** - blood test used as an initial broad medical screening for abnormalities such as high cholesterol and triglycerides
- Nicotine Metabolite - urine test to detect cotinine (nicotine/tobacco use)

Be sure you are using the 2017 Wellness Incentive Lab Corp form which lists both of the above specific screenings!

## Locate a LabCorp Patient Service Center (PSC) for specimen collection:

- Go to the LabCorp website at [www.labcorp.com](http://www.labcorp.com). Click on Find a Lab. Enter zip code. You can also schedule an appointment while on the website (remember you must fast when scheduling).

**OR**

- Call toll-free 1-888-LABCORP (522-2677).

**\*\*\*\*Please note to only go to a PSC that has the name LabCorp\*\*\*\***

This will be both a urine and blood (**FASTING IS REQUIRED**) collection. You must take the following with you to the LabCorp PSC:

- **LabCorp Clinical Requisition Form** – enter only the following information on the form (leave the rest blank):
  - Last/First name
  - Date of birth
  - Home address (for Lab Corp to mail the results of your A1c test). Stein Mart will NOT receive your results
  - On left hand side, circle the ID/Doctor for your state
- **Photo ID**

It is very important you bring these two items with you when you arrive at the LabCorp PSC.

By engaging in the Stein Mart Wellness Incentive Program and submitting to this LabCorp screening, I permit the Lab or its affiliate to report my results to Stein Mart for Wellness Incentive purposes and will abide by the provisions of the Program.
